Doctor Herman Room Converter

to neutralize e-smog and strengthen resilience.

Neutralize the disturbing influences of eccentric smog in your habitat.

Bio resonance for increasing vitality and resilience.

The new challenge posed by the digital revolution!

This can lead to problems.

How is e-smog formed?

Electro smog occurs wherever technically induced electric, magnetic and electromagnetic fields occur. Although digital radio signals are low-powered, they have a particularly strong influence on the biological ability of life. As a person today, you hardly have the opportunity to avoid these radio signals. From mobile phones, WLAN, transmission systems of all kinds, as well as from satellites, radio frequencies are constantly reaching our cells and influencing them significantly. This is not about the amount of electricity (thermal electro smog), but about the negative information of these frequencies (non-thermal electro smog = scalar field noise).

Electro smog is an invisible danger that has been tested in many facets and interpreted in different ways. Modern information medicine sees a threat in the non-thermal effect, i.e. the negative frequency influence of the body's cells by e-smog.

Problem identified - solutions found.

For more than 30 years, our research team has been researching and developing the problem of non-thermal electro smog, but also of many other frequencies as well as magnetic field deficiency syndrome, with its internationally recognized advisory board. The **Doctor Herman Room-Converter** systems can be used to neutralize the harmful effects of electro smog stray fields from generated electricity. Simply put, frequencies of the electromagnetic wave (the transmitting current of the devices) are sent along so that the positive, biologically relevant frequencies in the body are strengthened (resilience, increase and neutralization of scalar stray fields). In addition, the clock frequency of the earth's magnetic field is made available to the cells through the 8 Hz sine wave.

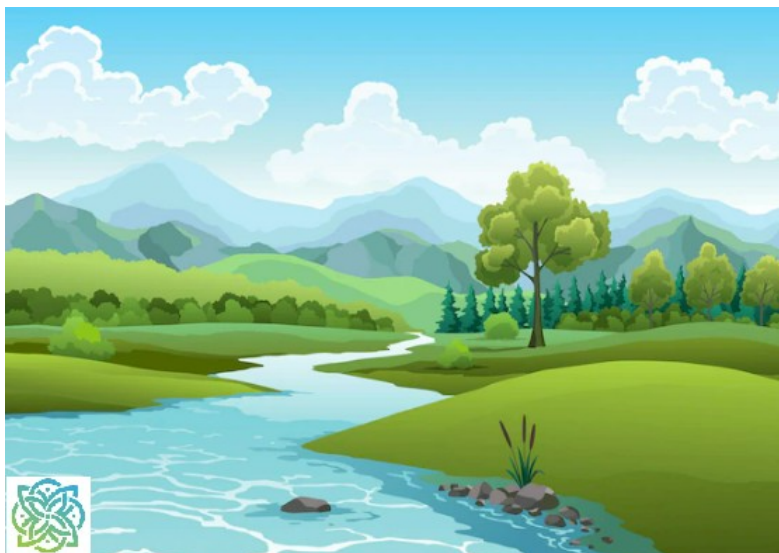

How am I supposed to understand this?

Everything that lives is made up of cells. Each cell has its task. The control of the cell task is carried out by epigenetics (controls the DNA). Every living cell has thousands of receptors (so-called receptors) that perceive frequencies (according to Prof. Dr. Bruce Lipton "signals") and make this information available to the cell nucleus. This is done by the effector.

Know the cell receptors that occur in nature - the frequencies. However, the new digital frequencies are still unknown to them. You need to learn to understand these new frequencies of influence. This process takes many generations. This is evolution.

Until evolution is complete, the new, non-thermal and, above all, digital frequencies are to be regarded as interference fields (scalar stray fields = e-smog). They have a negative effect on cell function. As a result, cells mutate uncontrollably into new "beings" and can cause massive damage. In their new, mutated frequency, they no longer fit into the biological pattern of the human body.

That's the big difference between evolution and mutation. At the moment, a mutation is happening in a form that has never been seen before!

How does the technology work?

The **Doctor Herman Room-Converter** technology is based on the function of providing the "biocluster" of people with the appropriate, natural and vital frequencies so that the body is optimized in its resilience, i.e. its own field strength, and can thus be vital and regenerated.

"Centering in chaos"

Quote Dr.med. Manfred Doepp, Information-Medical Room-Converter Expert Opinion

With the **Doctor Herman Room-Converter** technology, the primordial frequency (8 Hz clock frequency) is also fed into life. This primordial frequency comes from the earth and is called the earth's magnetic field. Over the course of billions of years, the whole of life has emerged from it. Even today, it nourishes all life. If there were no Earth's magnetic field, life would cease to exist. However, the Earth's magnetic field is changing, it has been weakening for a few centuries. In addition, people are increasingly in shielded rooms. In homes, commercial buildings, shopping areas, schools, means of transportation such as cars, public transport and so on. In most rooms, the Earth's natural magnetic field is excluded by a Faraday cage (by many metals such as iron, concrete and modern building materials). As a result, the life energy is withdrawn, the magnetic field deficiency syndrome (MFDS) develops.

Magnetic Field Deficiency Syndrome (Nakagawa) scientifically shows that the decreasing Earth's magnetic field and modern influences on body and mind are becoming more and more stressful.

Ask your advisor about the scientific papers on the MFDS

Regulating electrosmog and refueling the earth's magnetic field

We are "materialized heaps of energy"

Effect

With the ***Doctor Herman Room Converter***, you can neutralize electrosmog to a bioresonance frequency. At the same time, you bring the natural earth's magnetic field, as a nature-identical sine wave, directly into your living and working space. The positive properties are not only the neutralization of disturbing e-smog frequencies, but also the vitalizing properties on all people, animals and even plants in the catchment area of the ***Doctor Herman Room Converter***.

Thanks to the unique ***Doctor Herman Room converters***, different frequencies can be used individually. By installing a specific frequency on the ***Doctor Herman Room converter*** (through the use of a ***Doctor Herman Room converter*** card), different frequency patterns can be activated. In this way, the positive frequencies can be supplied to humans, pets, food, etc.

What is the direct benefit?

If the electro smog in the area of influence is neutralized with the ***Doctor Herman Room-Converter*** technology and the 8 Hz earth's magnetic field is transmitted into a room as a sine wave, many beneficial effects are created.

For example, by counter-regulating electro smog stray fields, typical, scientifically proven, negative influences can be mitigated. This can result in a lot of positive things;

- Memory may improve
- Reaction time (performance, vitality) can be improved
- Decisions are made correctly more often
- Health can be promoted indirectly
- Stress can be reduced, thus more performance - better interaction in the team
- positive frequencies can optimize sleep

Are there any regulations?

Since 18 November 2016, there has been an obligation for employers in the EU to protect their employees from e-smog. *This regulation does not exist in the United States or Canada.* Science agrees that fine e-smog frequencies, especially in the field of high frequencies such as WLAN transmitters, digital telephony, mobile phones, satellite signals, LED light sources, etc., are extremely harmful.

The legislature has not yet taken this fact into account. However, he is currently working intensively on scientific findings. It is only a matter of time before this gap is filled.

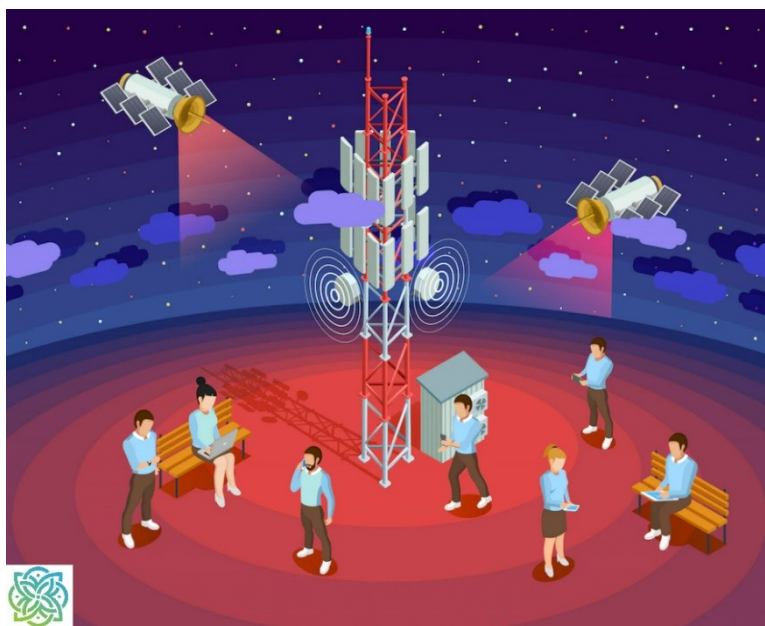

The WHO writes today: "non-thermal electrosmog may have carcinogenic effects" (group 2B).

What does that mean?

The economy is already alarmed. For example, large insurance companies and reinsurers already write in their policies that, quote: "all direct or indirect damage caused by electrosmog represents incalculable risks and has therefore been included in the insurance exclusion criteria."*

Mobile phone manufacturers have begun to write in their user manuals: "Only use devices at a distance of at least 1 m (3ft) from the body or carry them with you". How this is supposed to work is not described. However, it shows the respect that the providers of devices in the new digital world have for lawsuits from the court. Many judgments have already been made to the disadvantage of the manufacturers. Billion-dollar lawsuits are imminent.

* (e.g. 7.2.2015, insurance policy of CFC Underwriting Ltd., part of Lloyds of London)

Where do I have to convert e-smog?

Certainly, wherever people spend more than an hour under the influence of e-smog. Offer your employees, your family, your customers, patients and visitors a bioresonance atmosphere!

- Home
- Commercial and industrial enterprises of all kinds
- Office services (office, banking, accounting, etc.)
- Hotels and wellness centers
- Gastronomy, restaurants
- Fitness center, Gym
- Medical facilities, surgeries
- Sales outlets incl. checkout zones
- Post office, railway and other counters
- Car dealerships
- Training centers such as universities, schools, kindergartens, etc.
- Animal care and animal husbandry
- Agricultural holdings (farms, foodstuffs)
- ... Etc.

Doctor Herman Room-Converter

Transforming e-smog and bringing the feel-good frequency of the earth into the rooms

This is how the converter works.

Interference frequencies have been measured, analyzed and neutralized for many years by a technology developed in Switzerland, together with world-renowned experts. The frequency programming is done on so-called *converters*, which carry 24 carat pure gold and optimized minerals. The converters required for this are not only developed in Germany, they are also manufactured entirely in Germany. The final assembly is partly carried out in the USA (for the US market). This guarantees the safety and long-lasting quality of all ***Doctor Hermann Room converters***.

Through bio resonance programming, the ***Doctor Herman Room converter*** cards of the ***Doctor Herman Room converter*** are charged in such a way that potential interference frequencies can be neutralized. With the clocked devices, ***Doctor Herman Room-Converter*** and the ***Doctor Herman The-Cell-Body-Converter***, the frequencies of the natural earth's magnetic field are also emitted. With the ***Doctor Herman Room-Converter***, the biological resilience ability for the recording of all frequencies is increased, with the ***Doctor Herman The-Cell-Body-Converter*** even the cell frequency charged directly in the body.

1. Pulsation Earth's magnetic field
2. Bioresonance activated
3. Promoting resilience
4. Electrosmog neutralizing

Self-regulation and positive influence!

Existing electromagnetic waves and the 8 Hz geomagnetic wave are used to transmit the information from the ***Doctor Herman Room converter*** and to correct for potential interference fields. This corresponds to the principle of bio resonance.

All devices in the catchment area of the ***Doctor Herman Room converter*** are converted to bio resonance sources. For the frequency programming of the ***Doctor Herman Room converters***, 24 carat gold and magnetite are used. This also strengthens the "mirror function" of the auto field regulation.

Each **Doctor Herman Room Converter** has up to three slots for the Doctor Herman Room Converter Card, *depending on the version**. Two **Doctor Herman Room Converter** cards can be placed on top of each other per slot. In total, the **Doctor Herman Room-Converter** has a capacity (*depending on the version**) of up to six different **Doctor Herman Room-Converter-Card** frequencies at the same time. Important: The **Doctor Herman Room Converter** Card must be inserted with the label facing upwards.

Here are the different **Doctor Herman Room Converter** Cards that are **included in the set**.

E-smog: Negative information from all mobile radio systems (including 5G), LED and infrared radiation, as well as e-smog-producing devices and lines can be neutralized. This Converter Card is already installed in the device

Sleep Well: This provides you with various information on the subject of letting go, recharging and processing energy. The aim is to achieve regenerative and vital sleep.

Concentration: It provides the ideal frequencies for concentration and memory. Cognitive performance can increase significantly thanks to the activation of frequencies.

Hawaii Harmony: Hawaii is considered the central center of the primordial energy of our earth. Here these frequencies are made available to you. Enjoy the Hawaiian feeling at home!

Relax & Regeneration: This provides you with various information on the subject of regenerating, letting go and living in the NOW. Ideal for meditating, Yoga, book reading, relaxing or simply for your well-being.

Sport & Fitness: Sport in nature is particularly healthy. They bring forest-nature energy into the rooms and thus indirectly increase performance and training success.

Food: This revitalizes food, activates the water molecules in the food and balances out negative information. As a result, food becomes more vital and bioactive.

Animal: This provides animals with various information that is specifically tailored to their needs. As a result, the animals can gain more vitality and balance.

I-frequency and P-Frequency

Detailed information can be obtained from your personal advisor.

More than **30** different **Doctor Herman Room Converter** Cards are available in our program.

Use of the *Doctor Herman Room-Converter*

Transforming e-smog and bringing the feel-good frequency of the earth into the rooms

Use and scope of action

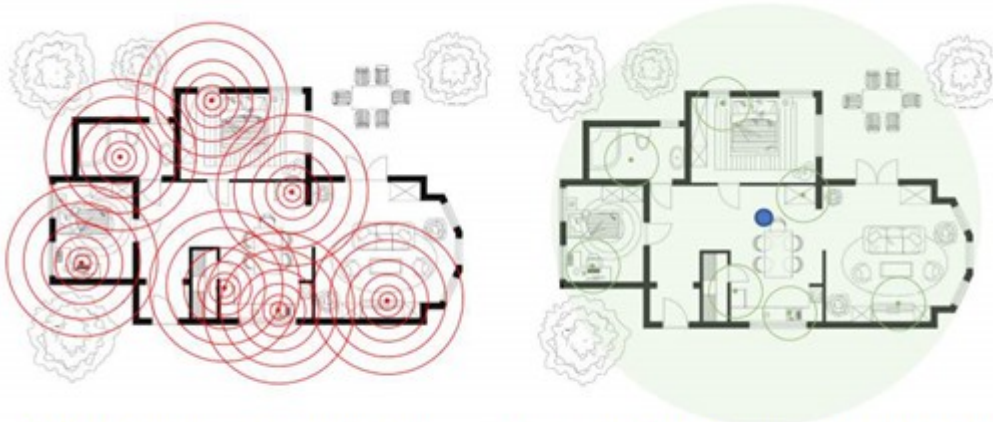

The *Doctor Herman Room-Converter* has a spherical emission of around 25 meters/75ft (diameter) *depending on the version**. In this sphere of influence, the *Doctor Herman Room Converter* activates all devices, cables, light sources, transmitters, but also negative e-smog frequencies incident from outside, to a bio resonance frequency. The disturbing field noise is neutralized. The body is provided with feel-good frequencies. All with the 8 Hz clock of the earth's magnetic field. A positive atmosphere is created.

The Square (our Flagship)

3 Slots (each 2 *Doctor Herman Room-Converter*-Card's, maximal 6 Cards)

Scope of action - spherical emission of around 25 meters/75ft (diameter)

Use in house, large apartment, large offices, etc.

**5G E-Smog areas without
Doctor Herman Room-Converter**

**Areas 5G E-Smog protected with
Doctor Herman Room-Converter**

Geomantic interference fields

Just as with electromagnetic interference fields, frequency interference from the geomantic areas is also corrected. Destructive interference can be used to correct grid interference, water veins and other interference fields. The neutralization of geomantic interference fields can take a few days or even weeks compared to the e-smog (which is corrected immediately).

What do I need?

In addition to the instructions for the *Doctor Herman Room converters*, companies can also take advantage of the help of trained consultants. Our certified specialists for electro smog regulation can not only help, they are also

authorized to submit the data for certification. As a result, a company can be labeled as an "electro smog bio resonance activated operation"

The right partner at your side

Doctor Herman – Expert in the field of electro smog regulation and geomagnetic field vitalization

Here's how it works!

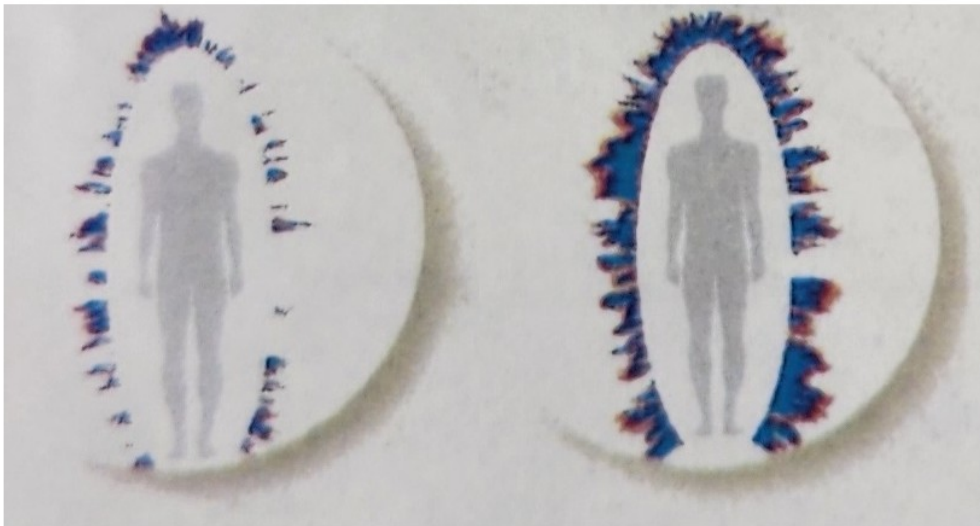

Our research department, with its scientific advisory board and its network of universities and research centers, provides you with a solution that already goes far beyond the legal framework. With the **Doctor Herman Room-Converter** you neutralize the negative frequencies of e-smog in rooms. In addition, the **Doctor Herman Room-Converter** clocks at 8 Hz, the clock of the Earth's natural magnetic field. The rooms become a feel-good zone.

Is there any scientific evidence?

In addition to many thousands of experiences in use, there are double-blind examinations as well as measurement results from many experts. Certifications such as Dr. Emoto water crystals, information medicine report from nuclear medicine specialist Dr. med. Manfred Doepp, scientific papers by Prof. Dr. Konstantin Korotkov (GDV), from the Brain Research Institute Haffelder, HRV examinations by Dipl.-Ing. MSc Rasmus Gaupp-Berghausen, Aqua-Quinta-Labor and other awards and results clearly show the effectiveness of our **Room-Converter** technology.

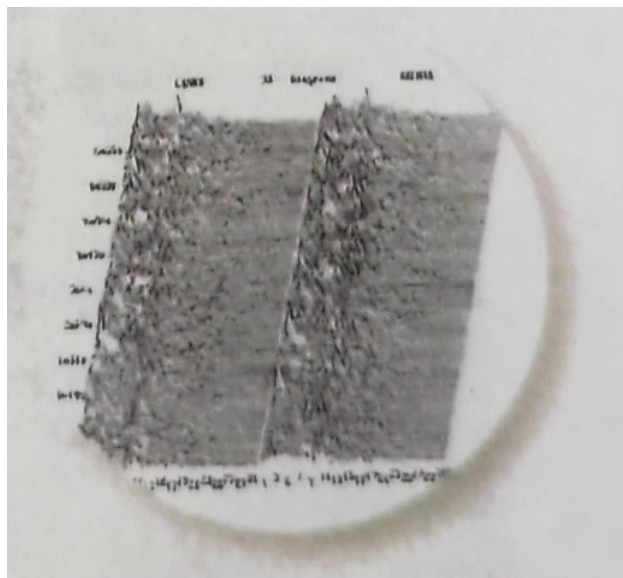

Prof.Dr. Korotkov, GDV International Kirlian-Austestung

Quote: "We were able to determine that these **Room-Converter's** are the only ones of all the commercially available converters we have tested that actually correct electro smog. Conclusion: The measurement data of the test subjects with these **Room-Converter's** were not worse despite the mobile phone being switched on, but even significantly better!"

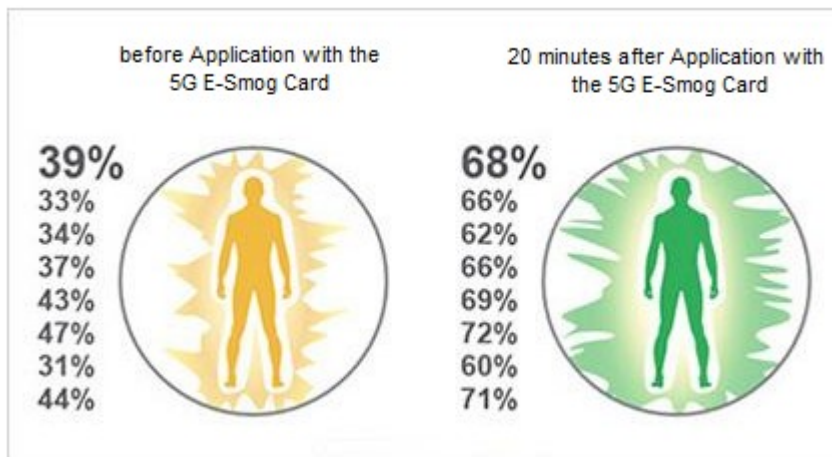

Günter Haffelder Institute for Brain Research Massenspektral-Elektroenzephalogramm

Quote: "With these **Room-Converter's**, the stress of e-smog goes away! These **Room-Converter's** reactivate the sensitive perceptions of the test subjects. The pineal gland blockages are dissolved.

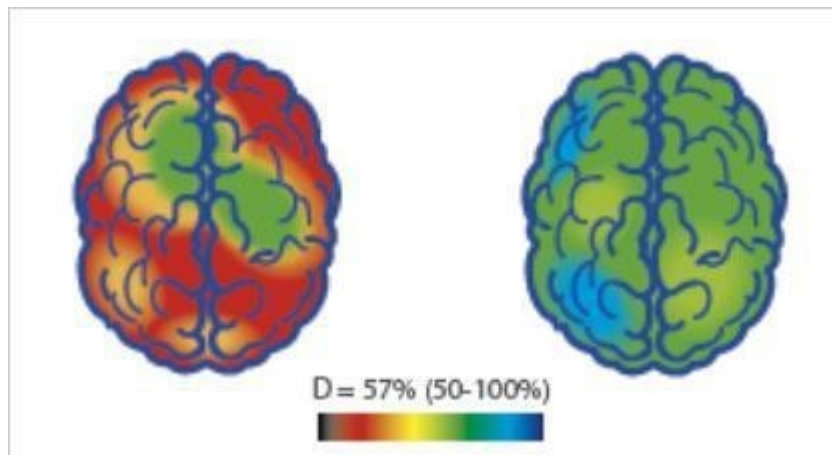

Health factor

The image on the left shows the physical condition with 39% health factor.
Before applying, recording right the state with the *converter* and a factor of 68%.

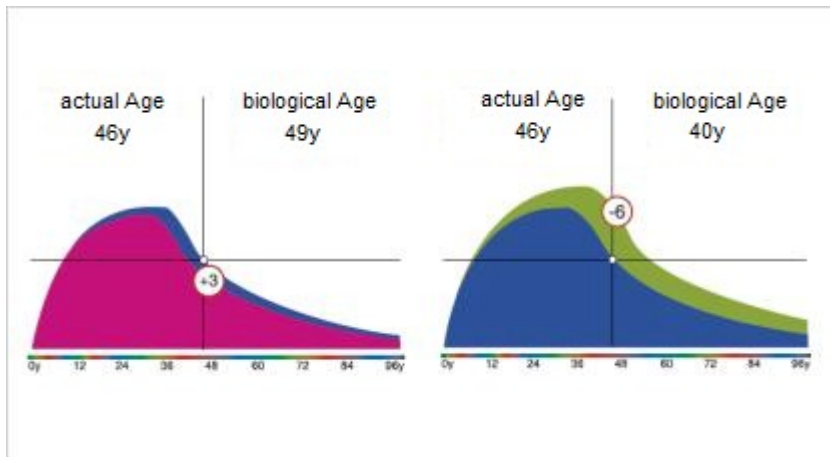

Activity of the brain

The spline map shows the electrical activity of the brain. Very tense on the left without a **Converter**, much more balanced on the right with a converter

Biological age

Without the **Doctor Herman Room Converter**, the gerontological curve shows a 49 years as the "biological age", and after about 20 minutes of use with the **Doctor Herman Room Converter**, it shows a 40 years ("rejuvenation effect").

Water crystal certification

Before application - after an hour

The Emoto Hado-Life laboratory carried out an energy measurement with the **Converter's**. A neutral water was vitalized in a glass for one hour.

Schumann Frequency”, in order to transport various positive frequencies that create a desired ambience. This was the only frequency that all nature was subjected before electricity became widespread and has a value of 7.83Hz. All of nature was in perfect harmony.

Note on scientific acceptance.

As a distributor, together with our manufacturer, we follow the obligation not to make any healing claims about the ***Doctor Herman Room Converter***'s. The statements and information made on the effects of the device are source-based, scientific studies, as well as user reports. We dissociate ourselves from any healing statements and promises of healing, as well as from statements of medical efficacy within the meaning of the Therapeutic Products Act (HWG) and the Unfair Competition Act (UWG).
