Doctor Herman – The Cell – Body Converter

Digitization and civilization put a strain on the body and psyche

Problems can arise from this.

Many people suffer from lack of concentration, fatigue, lack of energy, have physical problems or sleep poorly. Do you feel the same way? Then we would like to ask you the following questions:

1. Do you spend a lot of time indoors?
2. Do you regularly travel by car or public transport?
3. Do you also have a mobile phone, Wi-Fi, TV, etc.?
4. Is your workplace in an office, a workshop, a shop or in another building?
5. Do you eat an unhealthy diet from time to time?
6. Should you have more time for recreation and spend more time in nature?

An unhealthy lifestyle and the deprivation of the earth's natural magnetic field cause us many problems. In particular, the well-known Magnetic Field Deficiency Syndrome (MIFDS) often triggers civilization-related, physical but also psychologically emotional problems!

The MFDS is caused by too little time in nature (at least 2-3 hours a day would be ideal), by staying in houses (concrete is particularly absorbent), by staying in vehicles (Faraday cage in cars, buses, trains, etc.). due to the influence of modern transmission and device technologies (e-smog, 5G, WLAN, digitization in general, etc.) as well as through the natural decrease in the earth's magnetic field.

Unfortunately, you lose a lot of energy due to these influences!

The Magnetic Field Deficiency Syndrome (MFDS, Nakagawa) scientifically shows that the decreasing earth's magnetic field and the modern influences on body and mind are becoming more and more stressful.

The solution?

Wear the Earth's magnetic field directly on your body and recharge your batteries!

Life has been developing on Earth for more than 5 billion years. Man arose from the basic energy of the earth. The pulsating Earth's magnetic field is the clock generator and energy charger. Despite the technology, we are a "biobunch".

In recent decades, technical developments have overtaken us at a rapid pace. Digitization Mobile phones (e.g. 5G), WLAN, satellite signals, electric vehicles and much more are just a small selection of potential sources of interference for the human electromagnetic field.

The speed of the new stresses is so high that the human body and also the psyche lack the time to adapt to the respective innovations.

In order to rehabilitate itself, the human body needs the Earth's pulsating magnetic field more than ever. However, the Earth itself is currently losing power, because the Earth's magnetic field has lost about 50% of its intensity in the last 500 years.

The causes of magnetic field deficiency syndrome are:

- the Earth loses significantly in magnetic field intensity
- people spend too much time in homes, cities, vehicles, etc.
- the new influences of digitization (e.g. e-smog) disturb the body's own biological electromagnetic field

1. Pulsation Earth's magnetic field
2. Bioresonance activated
3. Promoting resilience
4. Electrosmog neutralizing

Charging energy

The body's cells need earth magnetic field energy supplied again in a natural sine wave (natural electricity) and ideal basic cell clock frequency (earth magnetic frequency = Schumann frequency).

Through a finely dosed supply of the pulsating earth's magnetic field, one's own vitality, regenerative capacity and resilience can be strengthened!

Through an optimal diet, plenty of exercise (2-3 hours a day in nature), daylight, fresh air and an alternation between rest and activity can bring us closer to this goal. For all those who are still busy in life (work, hobby, family, school, travel and much more), the **Doctor Herman – The Cell-Body-Converter** has been developed.

The **Doctor Herman – The Cell-Body-Converter** is a pulsating magnetic field to attract which rhythmically supplies the body's own cells with the frequency of the earth of 8 Hertz (known as the Schumann frequency 7.83Hz).

It corrects the magnetic field deficiency syndrome. In addition, regulation frequencies are installed against electrosmog pollution. Probably unique in the world!

Note on application:

The **Doctor Herman – The Cell-Body-Converter** may be worn regardless of an age limit. Nevertheless, it should be noted that the application of a pulsating magnetic field system (e.g. **Doctor Herman – The Cell-Body-Converter**). For example, in pacemakers, insulin pumps and other areas.

(see instructions or ask your consultant)

Inside the housing is a globally unique electronic concept with magnetic coils, sophisticated control electronics, light pulses and a battery that can be recharged again and again. The case of the **Doctor Herman – The Cell-Body-Converter** is a masterpiece and made entirely of a very energetic wood. The pendant on the case is silver-plated.

A charger with cable, magnet for switching on and off, leather strap for hanging around the neck, as well as the description/instructions are included.

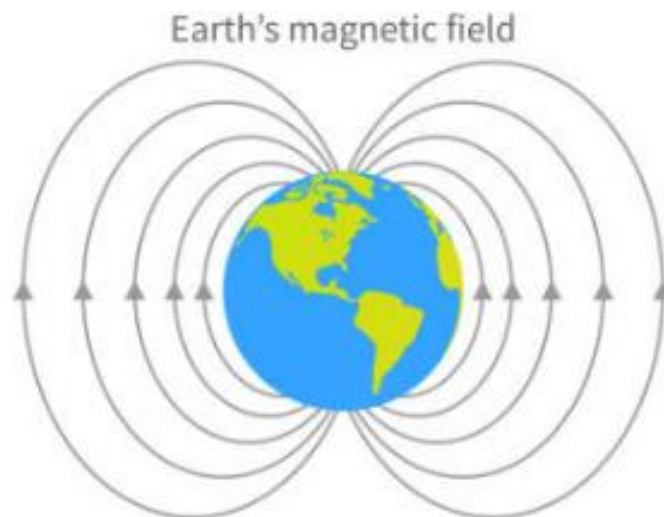

Doctor Herman – The Cell-Body-Converter recharges your cells!

What does the *Doctor Herman – The Cell-Body-Converter* do for me?

Doctor Herman – The Cell-Body-Converter to attract the pulsating earth's magnetic field.

The human organism regains its vitality through the nature-identical BHZ clock wave of the *Doctor Herman – The Cell-Body-Converter* in order to protect itself from stresses caused by environmental influences such as electrosmog (WLAN, mobile phone, laptop, TV, electrical appliances, etc.). Stress and more arise to fight back. This can significantly increase well-being

In contrast to therapeutic magnetic field devices (magnetic field therapy), which can only be used for a limited period of time, there is no overdose with the *Doctor Herman – The Cell-Body-Converter* because the pulsating frequencies are equivalent to the natural, pulsating magnetic field of the earth.

Bioresonanz Technologie

Doctor Herman – The Cell-Body-Converter

The *Doctor Herman – The Cell-Body-Converter* is programmed or charged by impulses (irradiation) from a specially developed bioresonance irradiation technique

The electrosmog regulation, counter-frequencies to interference fields of electrical devices, the transmitters and consumers (known as electrosmog or field noise) of all kinds, are uploaded as information to the *Doctor Herman – The Cell-Body-Converter*. This works on the principle of bioresonance regulation (irradiation technology). Thus, the body is stable (resilient) against electrosmog.

Through the combination of a pulsating earth-magnetic field, together with the neutralization of electrosmog pollution, the principle of bioresonance regulation is complete.

Bio-Resilience

Due to the pulsating magnetic field, which the body knows more than well, an intrinsic field amplification is brought about. In this way, the body can access its vital potentials much better (bio-resilience) and is thus automatically better able to deal with stress.

A strong self-field can lead to physical and mental relaxation. As a result, improvements in sleep are possible (more intense, more restful) as well as optimal regeneration of daily stresses from the environment (environmental toxins, electrosmog), negative influence of stressors, but also an increase in cognitivity (concentration, memory, reaction). In addition, strengthening resilience creates the possibility for the body to regenerate itself.

The rhythms of life (chronobiology) can find their way back to the actual task - the promotion and maintenance of vitality and well-being.

Note on scientific acceptance

As a distributor, together with our manufacturer, we follow the obligation not to make any healing claims about the ***Doctor Herman Room-Converters***. The statements and information made on the effects of the device are source-based, scientific studies, as well as user reports. We dissociate ourselves from any healing statements and promises of healing, as well as from statements of medical efficacy within the meaning of the Therapeutic Products Act (HWG) and the Unfair Competition Act (UWG).
